

- CATCH Control #1 setup to Monitor MAINS
- CATCH Control #2 setup to Monitor MAINS

- Slave the 2 Gen24's together (standard Fronius setup).
- Use Catch Control #3 as energy meter only **NO MASTER CONTROL**
- Following Fronius installation Guide to turn Sunspec ON for ALL inverters.
- Assign a static IP to all inverters
- Perform a MANUAL ADD in the CATCH Configurator to connect to all of the inverters.
NO MORE THAN 3 inverters on any one CATCH Control.

Th GEN24's will now see all loads on the premises.
